COMMENT

Meeting Attended:

Walsenburg Scoping Meeting

Important Issues:

Land Use (Agriculture, Residential, Recreation), Radio or Television Interference, Project Purpose and Need, Visual / Aesthetic Resources, Proximity to Residences

Property Uses:

Agriculture, Residential

Comment:

I have now had a few weeks to think about this and I have to disagree with it since there is not enough planning going into this. Right now there are several wind projects proposed for Huerfano County. None would be able to use this proposed line. Why not combine these. Am I going to go through the same thing several times as entities try to get their power to Comanche in Pueblo. I live on County Road 110 (Iscar rd) east side of I-25. It seems like 75% of this area is a proposed route. If you use an existing route then the existing line should be removed and replaced with the new line. Of course this is big business and you will do what you want, since you have the power of eminent domain, right? Bottom line since this is going to happen, use the route to the far east after leaving your new proposed substation. Another bottom line, I get nothing from this, I wish I could do the same to you sometime just so you know what it is like.
